Gauteng Sunbeam Club Dam Busters Run

Following a long tradition of at least 15 years ago, that started with the Sunbeam Sports Car Club deciding to organize car events at different dams on the first of May to be called “Dam Busterts Runs”, the Gauteng Based Sunbeam Sports Car Club once again organised the 2026 Dam Busters Run for the 1st of May.

Unfortunately, extremely heavy rain and the fact that May 1st fell on a Friday, creating a long week-end, the participation was slightly less than was expected.

Once again, the run was in the format of a fun run with clues and a route map, and as always has been the case, a great Story Book was created by Godfrey, giving the drivers a lovely, colourful history of the places where they would be driving around and searching for their clues and answers

To try and keep petrol costs down, it was decided not to choose an area to far removed from the JHB/Pretoria area and the run was organised around a historic look at Pretoria. I have, in the event of any interest, included the Story book in the email containing the newsletter.

So gaze at the photos and for those who did not participate, see what you have missed.
